

Maintaining the Reliability of Other Mature Fields in Kalimantan

We also manage oil and gas fields, which is, belongs to PT Pertamina EP and PT Pertamina Hulu Energi, and consists of Sangasanga Field, Sangatta Field, Maratua Field, Tanjung Field, Bunyu Field, Tarakan Field, Nunukan Field, East Ambalat Field, Simenggaris Field, Ambalat Field, Bukat Field, and PT Pertamina Hulu West Ganal.

We are continuously to maintain the reliability of all fields to deliver oil and gas for Indonesia.

In 2023, the average oil production was 14.9 thousand barrels of oil per day (MBOPD), and the average gas production was 91.3 million standard cubic feet of gas per day (MMSCFD). Oil and gas exploitation included production operations, either through own operations or partnerships.
